Education

Savitribai Phule Pune University

Sharadchandra Pawar College of Engineering

(Nov 2022 – May 2026)

B.E in Computer Engineering CGPA: 7.41

Pune, MH

Experience

Web development Intern, Proazure

(Feb 2025 – Nov 2025)

| JavaScript, React.js, Node.js, Express.js, MongoDB, REST APIs, JWT, Stripe API

On-Site Pune, MH

- Built a **full-stack e-commerce** web application with **secure authentication** and role-based access control using **JWT** and **bcrypt** for user and admin management.
- Developed **RESTful APIs** with **Node.js** and **Express.js**, integrated **MongoDB** for scalable data storage, and implemented advanced filtering, pagination, and product search functionality.
- Deployed application using **Docker** and **Nginx** with **CI/CD pipeline** integration, improving deployment efficiency and reducing downtime by 40%.

Technical Skills

- **Automation & IaC:** Python, Ansible, Terraform (Basic), Bash / Shell Scripting
- **Networking Fundamentals:** TCP/IP, DNS, DHCP, BGP, OSPF, VLANs, NAT, ACLs, VPN, SD-WAN
- **Testing Tools:** Postman, REST Assured, Selenium (basic), JIRA, Git, GitHub
- **Programming Languages:** Java, Python, JavaScript, SQL, C/C++, HTML, CSS
- **Databases:** MySQL, MongoDB – query validation, data integrity checks
- **Frameworks & Libraries:** Node.js, Express.js, React, TensorFlow, Django, Spring Boot
- **API & Integration:** REST APIs, NETCONF, RESTCONF, YANG, JSON, YAML, Postman
- **Version Control & CI/CD:** Git, GitHub, GitLab, Jenkins, CI/CD Pipelines
- **Developer Tools:** Git, GitHub, Linux, VS Code, Google Colab, Docker Projects
- **Machine Learning & AI:** Human Activity Recognition (HAR), Deep Learning, LSTM (Long Short-Term Memory), Pose Estimation

Project Name:

Human Activity Recognition Using MediaPipe Pose and LSTM

(Mar 2024 – Oct 2024)

Duration: July 2025 – May 2026 (11 Months)

Role: Machine Learning & Python Developer / Team Member

Team Size: 3

Environment / Tools: Python, Flask, MediaPipe Pose, TensorFlow/Keras, LSTM, OpenCV, NumPy, Pandas, Scikit-learn, HTML, CSS, JavaScript, VS Code, Git, Jupyter Notebook

Project Description:

Developed a real-time Human Activity Recognition (HAR) system using MediaPipe Pose and an LSTM deep learning model. The system extracts 33 body pose landmarks from video frames, preprocesses skeletal data, and classifies seven human activities such as walking, sitting, standing, clapping, walking while reading, and walking while using a phone. A Flask-based web application enables live webcam prediction and uploaded video analysis.

Responsibilities:

- Collected and prepared the HAR dataset for training.
- Implemented pose landmark extraction using MediaPipe Pose.
- Preprocessed and normalized skeletal landmark data.
- Designed and trained an LSTM model for activity classification.
- Developed a Flask web application for real-time webcam and video-based predictions.
- Integrated OpenCV for video processing and live streaming.
- Tested and evaluated model accuracy and performance.
- Prepared project documentation, reports, and presentations.

Handwritten Digit Recognition AI

(Nov 2025)

| Python, Flask, Scikit-Learn, HTML5, JavaScript, Canvas API, Machine Learning, MNIST

- Trained an MLPClassifier model on the MNIST dataset with robust preprocessing (center of mass, bounding box cropping) to match input format.
- Built a Flask web API to serve predictions; managed reproducible setup via Python requirements file.

- | HTML, CSS, JavaScript, EJS, Node.js, Express, MongoDB, Git, Responsive Design
- Developed multiple frontend and full-stack web applications while following the Apna College Web Development curriculum
 - Implemented interactive features such as DOM manipulation, dynamic routing, templating using EJS, and CRUD operations with MongoDB
 - Strengthened core concepts of web development including client-server architecture, RESTful routing, and backend integration

Relevant Coursework

- Data Structures & Algorithms
 - Machine Learning & GenAI
- Object Oriented Programming
 - Software Design and Methodologies
- Database Management Systems
 - Web Technologies

Certifications

- Apna College Wb Development Course: **Apna College**
 - The Data Science: Launched by **codewithharry**
- (Oct 2025)

(Nov 2025)

Achievements

- Active on competitive coding platforms: Leetcode
